Q2 (i) There is an urgent need for Forensic Expert in India

⇒ Introduction : Forensic science is the applied version of basic sciences in the law and court for providing proper justice.

There are some reasons of urgent need of forensic Experts in India because →

① Social reason

In today's society the technology has used and number of crimes also increasing. So, third degree analysis and investigation is not suitable to solve the cases in India. It should be developed. That's the reason why there are many unsolved cases left in India today.

(II) Increase of population and technology

The population as well as scientific techniques are also increasing day by day. So, the process of investigation should be remodified and as the criminals are using modern scientific techniques today. To solve these new forensic experts are needed.

(III) Widening of Crime

The rate of crime has involve today's world from local to national in fact international. Such as, Terrorism, Smuggling, Drug transport. So the need of solving this is too high and the need of forensic experts also.

(IV) Influence of New Acts

The new law of BSA, BNSS, BNS have given more priority to Forensic Experts to solve cases now a days. If a case is pending more than seven years, inclusion of forensic expert is must. It is necessary for urgent need of forensic Science.

(V) Effectively Analysis

In a Crime Scene, presence of forensic experts is also very important because of no or almost minimal contamination of evidence.

So a specific forensic expert is needed to analyse it better. Always give priority to fact not face value.

iii) Forensic Science is a multidisciplinary field.

Introduction: forensic Science is the application of scientific methods and techniques in the court of law to provide justice. It is a Multidisciplinary field because.

Disciplines of forensic Science
